

Marina @ Rowena
Lake Cumberland, Kentucky

The U.S. Army Corps of Engineers is seeking public comment on the proposed development of a new marina known as Marina @ Rowena, LLC. Comments are being accepted by the U.S. Army Corps of Engineers until March 3, 2017. This is considered one of the final stages of review before this project can be approved and before construction can begin. As a previous supporter of this project for the counties of Clinton, Russell and the entire Lake Cumberland Region, your submittal of a letter of support “NOW” is greatly appreciated. The Marina @ Rowena project will provide expanded recreational services and facilities in an “under-served” area of the lake that is currently “void” of any services. In addition to new jobs, this new marina will provide a much-needed positive economic impact for an area that is currently impoverished and in need of new economic development. Jobs; increased tourism; increased revenue for local communities; increased property tax revenue; increased residential development; increased property values; are all benefits of this new marina development. Please let the Army Corps of Engineers know that you support this project and that the positive economic benefits of this marina far outweigh any minimum environmental impacts that this development may have. Your continued support is greatly appreciated.
